SKILLS

- Python : Pandas, NumPy, Seaborn, Matplotlib, Pickle, Scikit-learn | Keras, TensorFlow
- R
- Tableau
- SQL : MySQL

EDUCATION

MASTER'S DEGREE IN DATA SCIENCE

Università degli studi di Catania
2021

BACHELOR'S DEGREE IN ELECTRONICS ENGINEERING

Università degli studi di Catania
2017 - 2021

PROFILE

I am a Data Science student, my goal is to increase my knowledge and put it into practice in the work environment.
What characterizes me are my determination and eagerness that allow me to always be ready to overcome any challenge

ABOUT ME

I define myself as a maker, I'm passionate about the world of 3D prototyping, a stimulating and challenging field that has shaped my mentality by helping me to think critically about problems. My latest commissioned project was about smart lamps made with the use of CNC and 3D printers.

In recent years I have also become passionate about the world of Artificial Intelligence, which is why I chose to follow a course of study in Data Science. I believe that the best way to learn something is to put it into practice, which is why I dedicate part of my free time to carrying out projects aimed at strengthening my skills.
